

### Product Description

The industrial 4343HE flat panel detector provides industry leading image quality for industrial and security applications. Varex Imaging's amorphous silicon-based detectors are the benchmark for radiography in industrial.

Key advantages include:

- Design for high dose applications > 1 MRad
- Wide energy range: 20 kV - 16 MV
- Internal shielding up to 225 kV  
Electronics are outside of the detector active area allowing the integrator to provide additional external shielding of the electronics for use above 225 kV.
- Gigabit Ethernet link to workstation
- Optimized MV imaging with standard geometry and kV imaging with reverse geometry

### Technical Specifications

|                      |  |
|----------------------|--|
| Receptor Type        | Amorphous Silicon                        |
| Conversion Screen    | DRZ+*                                    |
| Pixel Area - Total   | 42.7cm (h) x 42.7cm (v) (16.8 x 16.8 in) |
| Pixel Matrix - Total | 3,072 (h) x 3,072 (v)                    |
| Pixel Pitch          | 139 $\mu$ m <sup>2</sup>                 |
| Energy Range         | 20 kV - 16 MV                            |
| Fill Factor          | 64.3%                                    |
| Data Output          | Gigabit Ethernet                         |
| Scan Method          | Progressive                              |
| A/D Conversion       | 16-bit                                   |
| Frame Rate           | 4 fps (1x1), 15 fps (2x2)                |
| Exposure Control     | User Sync input, Expose OK output        |

### ViVA™

The software release includes ViVA™, a basic application for panel testing and calibration acquisition and viewing on an end-user workstation running Microsoft® Windows™. The developer's software package includes a "Virtual Command Processor" software interface that performs detector calibration, detector set-up, image acquisition, and image corrections. ViVA™ includes file type translators for .viv, .raw, .jpg, and .bmp file formats.

\* other scintillators available upon request

### Power Requirements

|                      |                       |
|----------------------|-----------------------|
| Power Dissipation    | 25 watts              |
| Power Supply/Adaptor | 100-240 VAC, 47-63 Hz |

### Mechanical

|                     |   |
|---------------------|---|
| Weight              | 14.6 kg (31 lbs.) panel                     |
| Housing Material    | Aluminum                                    |
| Sensor Protection   | Carbon fiberplate (3.5mm) & aluminum (0.05) |
| Mounting Provisions | Blind, threaded mounting holes on the back. |

### Environmental

|                                    |                       |
|------------------------------------|-----------------------|
| Temperature Limit - Operating      | +10°C to +35°C (max.) |
| (Ambient) -Storage                 | -15°C to +50°C        |
| Relative Humidity (Non-condensing) |                       |
| Operating & Storage                | 10% - 90%             |
| Atmospheric Pressure               | 70 kPa - 106 kPa      |

### Regulatory

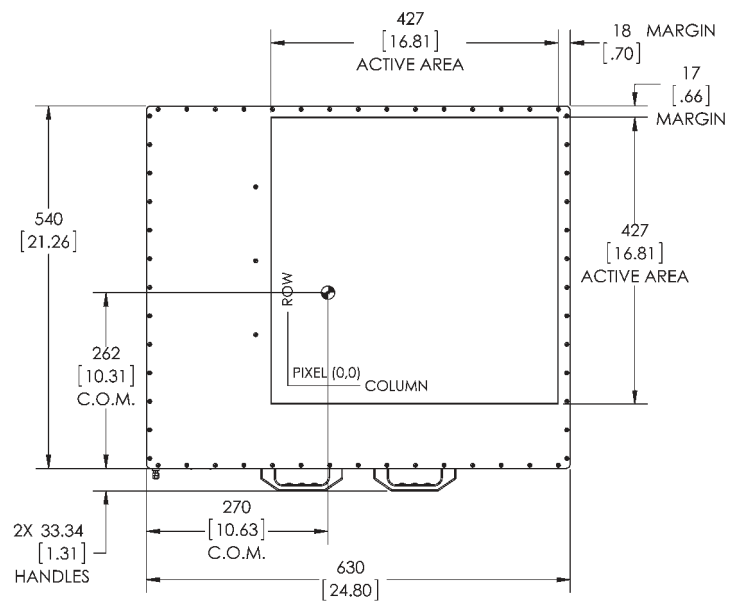

|        |                           |
|--------|---------------------------|
| Canada | CAN/CSA-C22.2 No. 61010-1 |
| U.S.   | UL 61010-1                |
| Europe | EN 61010                  |

Dimensions are in mm (inches)

**KV Imaging**

**MV Imaging**

Detector Characterization Charts in accordance with ASTM E2597-14 Standard Practice for the Manufacturing Characterization of Digital Detector Arrays

NOTE: SMTR, CS and Lag quality numbers all improve with higher frame rate. For the same inspection time, higher frame rates enable higher beam power.

Full Resolution - 2pF Gain setting

**Aluminum 6061**

**Inconel 718**
